

Linux & Shell Scripting

Week 5 Tasks

Problem 1:

Create a new directory called "assignment1" in your home directory. Inside "assignment1", create a new file called "file1.txt". Append the text "Hello World" to "file1.txt".

Problem 2:

Figure out how can you use nslookup to find name and IP address of SMTP server of gmail.com

Problem 3:

Create a compressed archive of the "assignment1" directory in your home directory. Save the archive as "assignment1.tar.gz". Delete the "assignment1" directory.

Problem 4

Try to play this game to refresh your knowledge om VIM: <https://vim-adventures.com/>

Problem 5

Create a new file called "assignment1.txt" using Vim. Type the text "This is my first Vim file" on the first line. Move to the second line and type "I am learning Vim". Save and exit Vim.

Thank You!
